

Elephant baby shower cake

I rolled out white modeling chocolate and embossed it with a fondant rolling pin like this [one](#). I then cut out the ribbons with a [wavy ribbon cutter](#) and punched holes with a small piping tip to create the lace effect. I sculpted the elephant out of gray modeling chocolate and the umbrella and ears out of pink. I attached the umbrella to a toothpick with piping gel and then pushed it through the elephant's trunk and secured it with more piping gel.
